

UNIVERSITY OF
CALGARY

The syntactic properties of individual and group classifiers in Mandarin

Peng Qiu

University of Calgary

June 01, 2023

Canadian Linguistic Association

WHAT IS A CLASSIFIER?

A **CLASSIFIER** is a word or affix that accompanies a noun. It can be used to express a conceptual classification of the referent of a noun.

non-classifier languages
(e.g., English)

3 students

classifier languages
(e.g., Mandarin)

3 **ge** xuesheng

3 **CL** student

'3 students'

MANDARIN CLASSIFIERS

Bare nouns can be interpreted as either singular or plural

xuesheng
'student'

MANDARIN CLASSIFIERS

To quantify a noun, a **CLASSIFIER** must appear.

(1) a. *3 xuesheng

three student

'three students'

b. 3 ge xuesheng

three **CL** student

'three students'

MANDARIN CLASSIFIERS

Two types of classifiers are considered here

individual classifiers

group classifiers

MANDARIN CLASSIFIERS

individual classifiers

for counting
atomic entities

(2) 3 **ge** xuesheng
three $CL_{\text{individual}}$ student
'three **(individual)** students'

group classifiers

for counting
non-atomic entities

(3) 3 **qun** xuesheng
three CL_{group} student
'three **groups** of students'

individual classifiers

group classifiers

- ANALYSIS II: MANDARIN CLASSIFIERS & *-men*

- ANALYSIS III: MANDARIN CLASSIFIERS & *de*

- CONCLUSION

RESEARCH QUESTIONS

Mandarin **individual** and **group** classifiers have **similarities** and **differences**, which raise two questions:

- i. Are **individual** and **group** classifiers similar because they have the same category?

- ii. If so, how do we account for the differences between these two types of classifiers?

SIMILARITY

Both **individual** and **group** classifiers appear between the numeral and the noun.

- (4) a. 3 **ge** xuesheng
three CL_{individual} student
'three students'
- b. 3 **qun** xuesheng
three CL_{group} student
'three groups of students'

DIFFERENCE

Group classifiers can co-occur with *-men*, but *individual* classifiers cannot.

- (5) a. *3 *ge* xuesheng-*men*
three *CL_{individual}* student-PL
'three students'
- b. 3 *qun* xuesheng-*men*
three *CL_{group}* student-PL
'three groups of students'

DIFFERENCE

Group classifiers can co-occur with linker *de*, but *individual* classifiers cannot.

- (6) a. *3 *ge* *de* xuesheng
three CL_{individual} DE student
'three students'
- b. 3 *qun* *de* xuesheng
three CL_{group} DE student
'three groups of students'

ROAD MAP

- RESEARCH QUESTIONS

- **ANALYSIS I: MANDARIN CLASSIFIERS**

individual classifiers

group classifiers

- ANALYSIS II: MANDARIN CLASSIFIERS & *-men*

- ANALYSIS III: MANDARIN CLASSIFIERS & *de*

- CONCLUSION

SIMILARITY

Both **individual** and **group** classifiers appear between the numeral and the noun.

- (7) a. 3 **ge** xuesheng
three CL_{individual} student
'three students'
- b. 3 **qun** xuesheng
three CL_{group} student
'three groups of students'

COMPLEMENTARITY

Individual and group classifiers cannot co-occur.

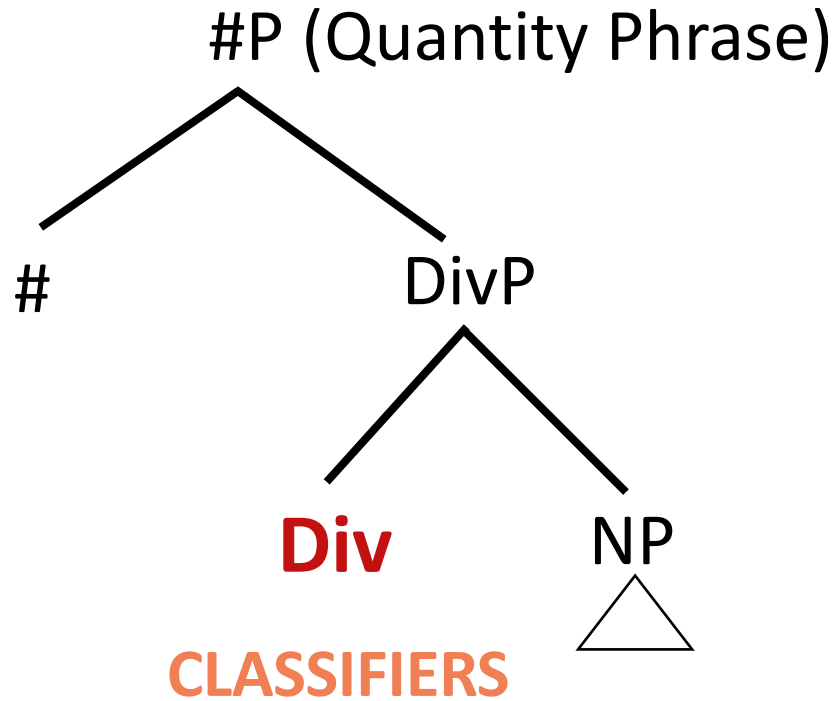

(8)	*3	ge	qun	xuesheng
	three	CL _{individual}	CL _{group}	student

RESEARCH QUESTIONS

Mandarin **individual** and **group** classifiers have **similarities** and **differences**, which raise two questions:

- i. Are **individual** and **group** classifiers similar because they have the same category?
- ii. If so, how do we account for the differences between these two types of classifiers?

BORER (2005)

- all nouns are mass and must be **divided** into units in order to be quantified.
- the dividing function is realized by a category, **Division (Div)**.
- **Div: CLASSIFIERS**

Mandarin **individual** and **group** classifiers are always generated in **Div**

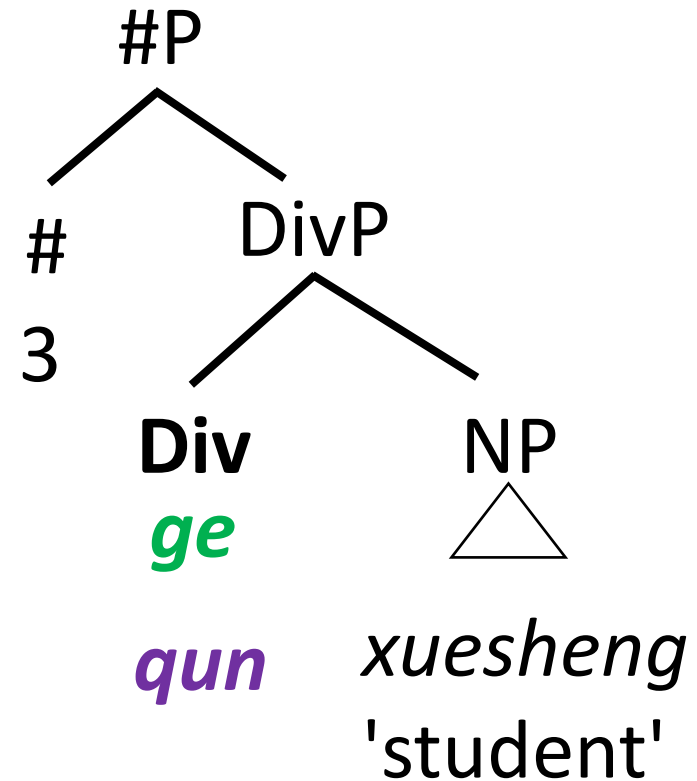

EXTEND TO MANDARIN

(9) a. 3 **ge** xuesheng
 three **CL_{individual}** student
 'three students'

b. 3 **qun** xuesheng
 three **CL_{group}** student
 'three groups of students'

c. *3 **ge** **qun** xuesheng
 three **CL_{individual}** **CL_{group}** student

RESEARCH QUESTIONS

Mandarin **individual** and **group** classifiers have **similarities** and **differences**, which raise two questions:

- i. Are individual and group classifiers similar because they have the same category?

- ii. If so, how do we account for the differences between these two types of classifiers?

ROAD MAP

- RESEARCH QUESTIONS

- ANALYSIS I: MANDARIN CLASSIFIERS

individual classifiers

group classifiers

- **ANALYSIS II: MANDARIN CLASSIFIERS & *-men***

- ANALYSIS III: MANDARIN CLASSIFIERS & *de*

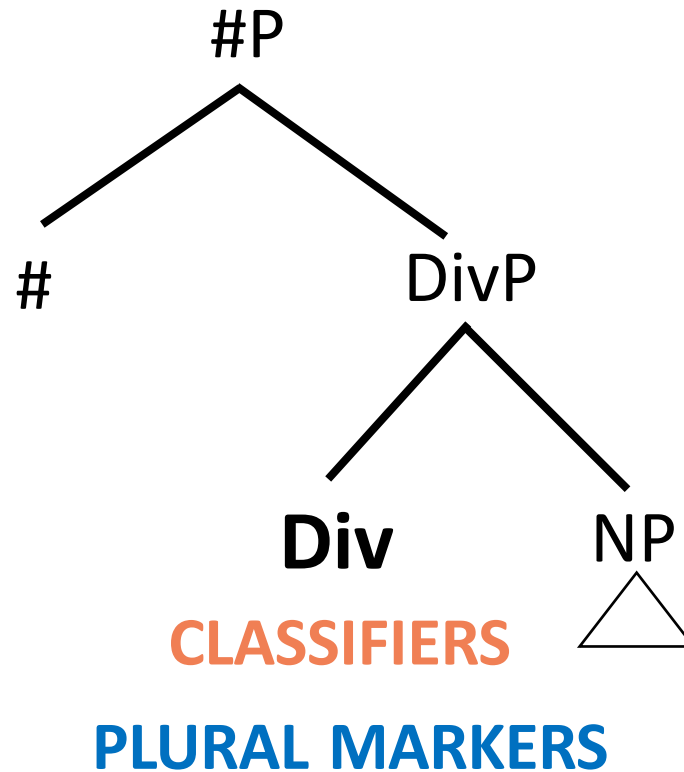

- CONCLUSION

BORER (2005)

➤ the dividing function

Classifiers

Plural markers

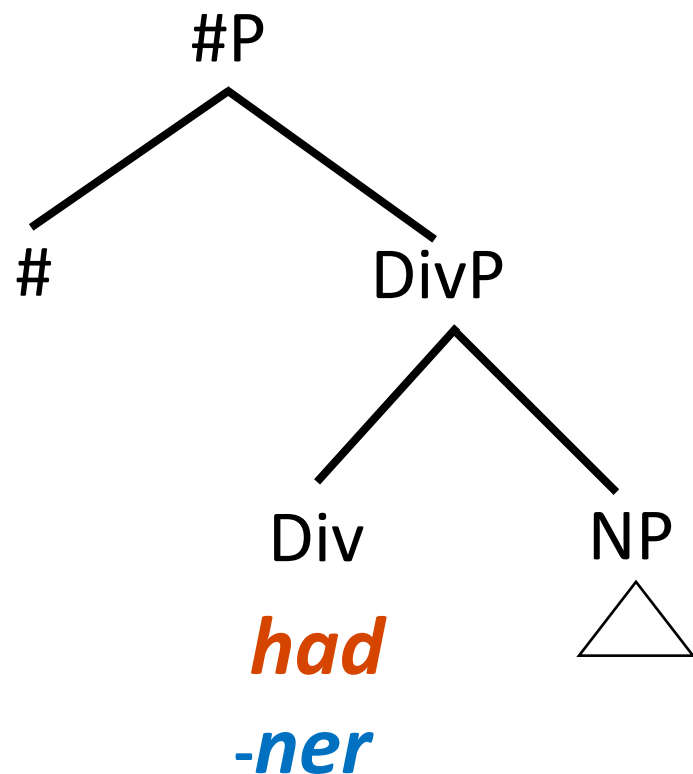

BORER (2005)

ARMENIAN

classifiers & plural marker

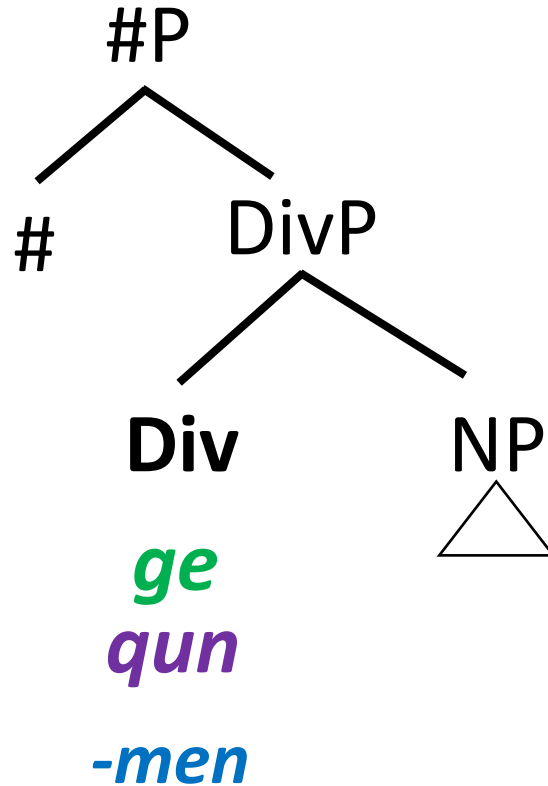

(10) a. 2 **had** hovanoc uni-m
 two CL umbrella have-1sg
 'I have 2 umbrellas.'

b. 2 hovanoc-**ner** uni-m
 two umbrella-PL have-1sg
 'I have 2 umbrellas.'

c. *2 **had** hovanoc-**ner** uni-m
 two CL umbrella-PL have-1sg

MANDARIN: A PROBLEM FOR BORER

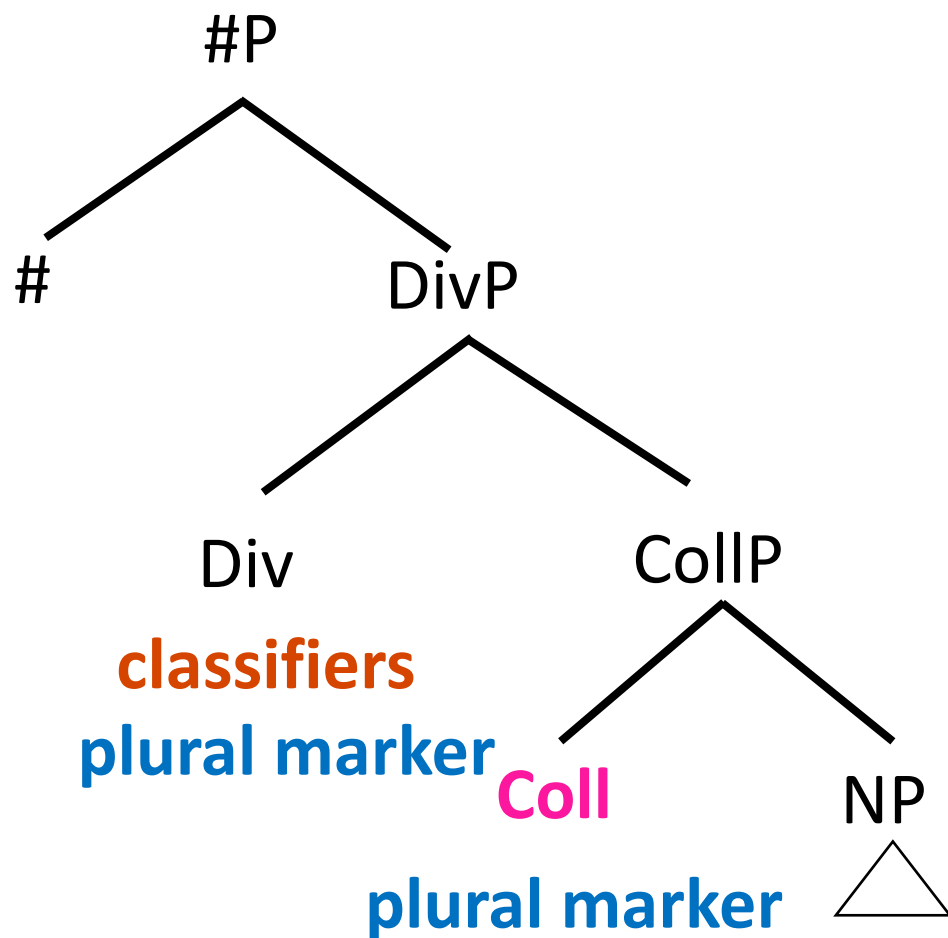

➤ *CL_{individual} + Noun-*men*

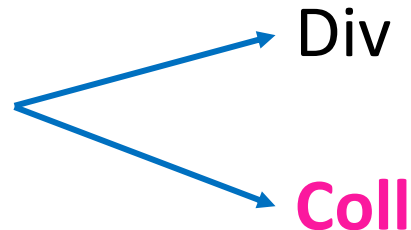

(11) *3 *ge* xuesheng-*men*
three CL_{individual} student-**PL**
'three students'

➤ CL_{group} + Noun-*men*

(12) 3 *qun* xuesheng-*men*
three CL_{group} student-**PL**
'three groups of students'

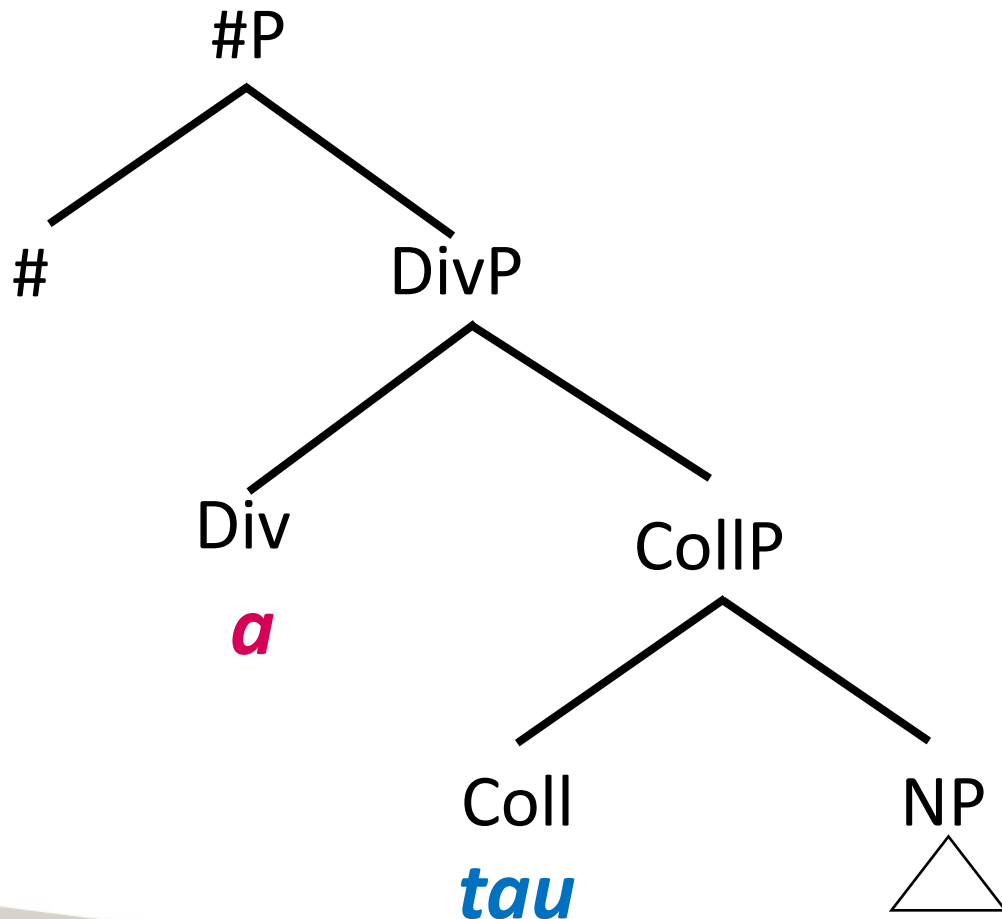

MASSAM (2009)

- modifies Borer's (2005) structure.
- proposes an additional phrase 'Collective' (**Coll**) between DivP and NP.
- 'Collective' (**Coll**): the denotation of nouns are groups.
- **Plural marker** 

MASSAM (2009)

NIUEAN (an Austronesian language)

classifiers & **plural marker**

(13) falu **a** **tau** fuata
 some CL PL youth
 'some youths'

MANDARIN: AN APPARENT PROBLEM FOR MASSAM

➤ CL_{group} + Noun-*men*

(14) 3 *qun* xuesheng-*men*
 three CL_{group} student-**PL**
 'three groups of students'

➤ * $CL_{individual}$ + Noun-*men*

(15) *3 *ge* xuesheng-*men*
 three $CL_{individual}$ student-**PL**
 'three students'

CL_{group} → *i*[GROUP]

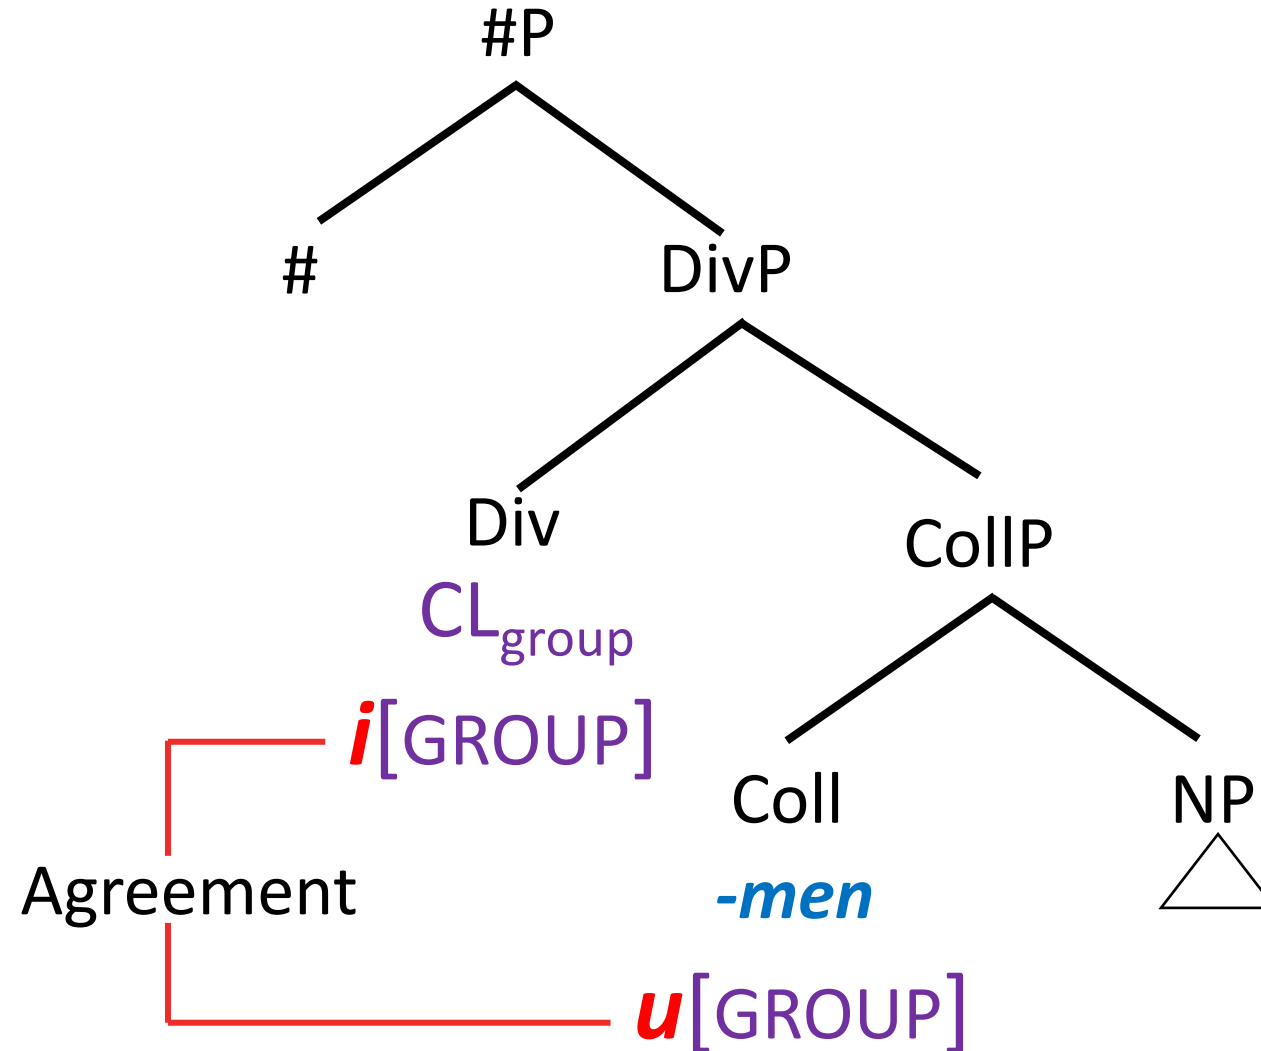

-men → *u*[GROUP]

[GROUP]: the group or collection
of entities

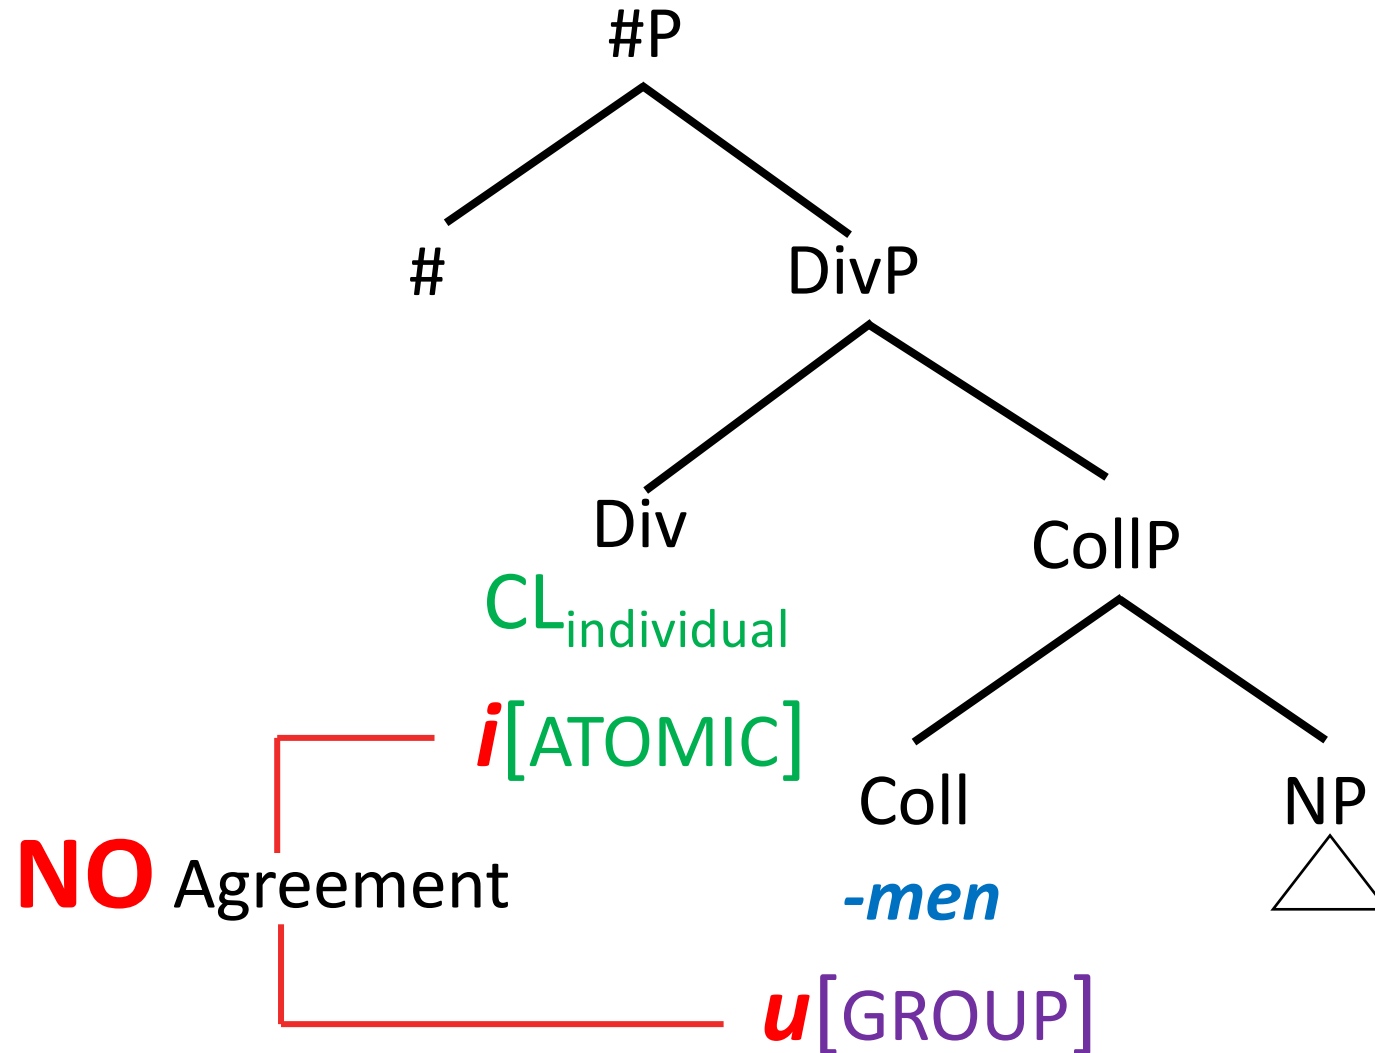

$CL_{\text{individual}}$ → *i*[ATOMIC]

[ATOMIC]: the individual entities

CL_{group} & *-men*

*CL_{individual} & *-men*

ROAD MAP

- RESEARCH QUESTIONS
- ANALYSIS I: MANDARIN CLASSIFIERS
 - individual classifiers
 - group classifiers
- ANALYSIS II: MANDARIN CLASSIFIERS & *-men*
- **ANALYSIS III: MANDARIN CLASSIFIERS & *de***
- CONCLUSION

SIMILARITY: *-men* and *de*

Group classifiers can co-occur with linker *de*, but *individual* classifiers cannot.

- (16) a. *3 *ge* *de* xuesheng
three CL_{individual} DE student
'three students'
- b. 3 *qun* *de* xuesheng
three CL_{group} DE student
'three groups of students'

COMPLEMENTARITY: *-men* and *de*

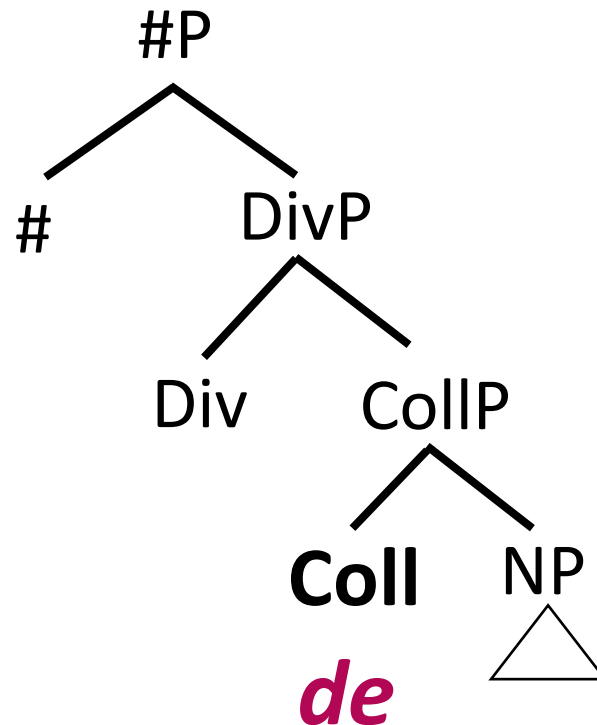

-men and **de** cannot co-occur.

- (17) *₃ qun **de** xuesheng-**men**
three CL_{group} **DE** student-**PL**
'three groups of students'

THE POSITION OF *de*

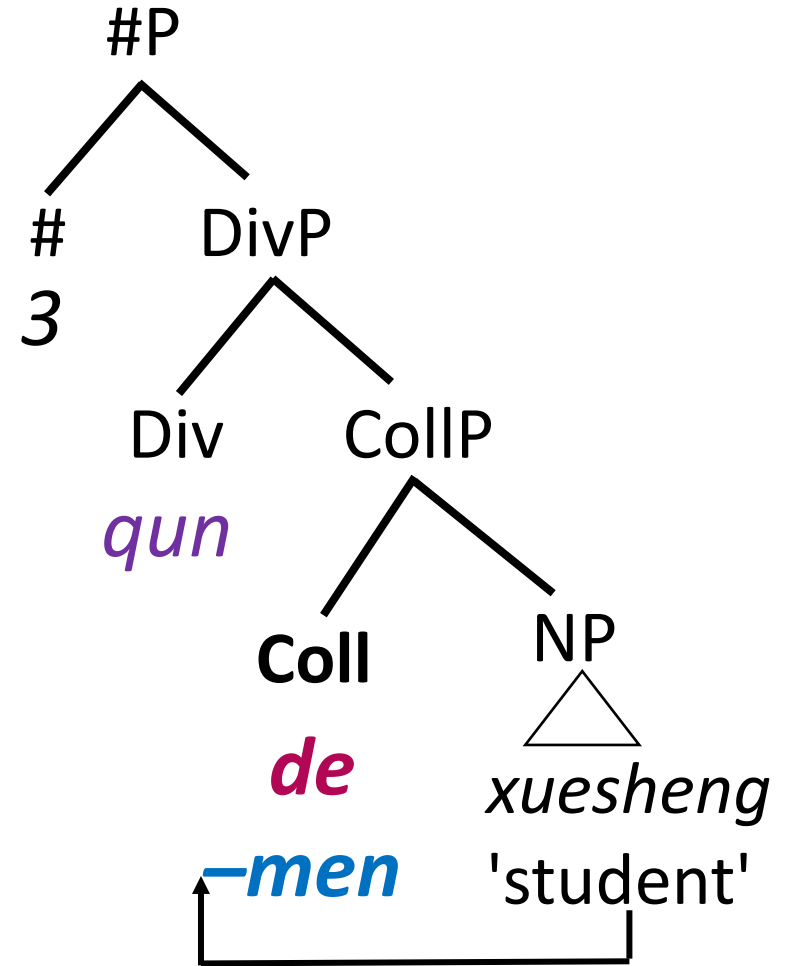

de is generated in Coll

THE POSITION OF *de*

- (18) a. 3 *qun* *de* xuesheng
 three *CL_{group}* **DE** student
 'three groups of students'
- b. 3 *qun* xuesheng-**men**
 three *CL_{group}* student-**PL**
 'three groups of students'
- c. *3 *qun* *de* xuesheng-**men**
 three *CL_{group}* **DE** student-**PL**

DIFFERENT READINGS: *-men* and *de*

UNIVERSITY OF
CALGARY

Noun-*men*: collective readings

- (19) xuesheng-**men** huode 1 ge jiangpin.
student-PL get one CL trophy
'The students got one trophy **together**.'

DIFFERENT READINGS: *-men* and *de*

UNIVERSITY OF
CALGARY

de Noun: **NO** collective readings

(20) a. piaoliang **de** xuesheng huode 1 ge jiangpin.
pretty DE student get one CL trophy

'Pretty students get a trophy **each**.'

b. piaoliang xuesheng huode 1 ge jiangpin.
pretty student get one CL trophy

'Pretty students get a trophy **each**.'

CL_{group} → $i[\text{GROUP}]$

$-men$ → $u[\text{GROUP}]$

[GROUP]: the group or collection of entities

$CL_{\text{individual}}$ → $i[\text{ATOMIC}]$

[ATOMIC]: the individual entities

de → **NO** features

MASSAM (2009)

- modifies Borer's (2005) structure.
- proposes an additional phrase 'Collective' (**Coll**) between DivP and NP.

➤ **'Collective' (Coll)**: the denotation of nouns are groups.

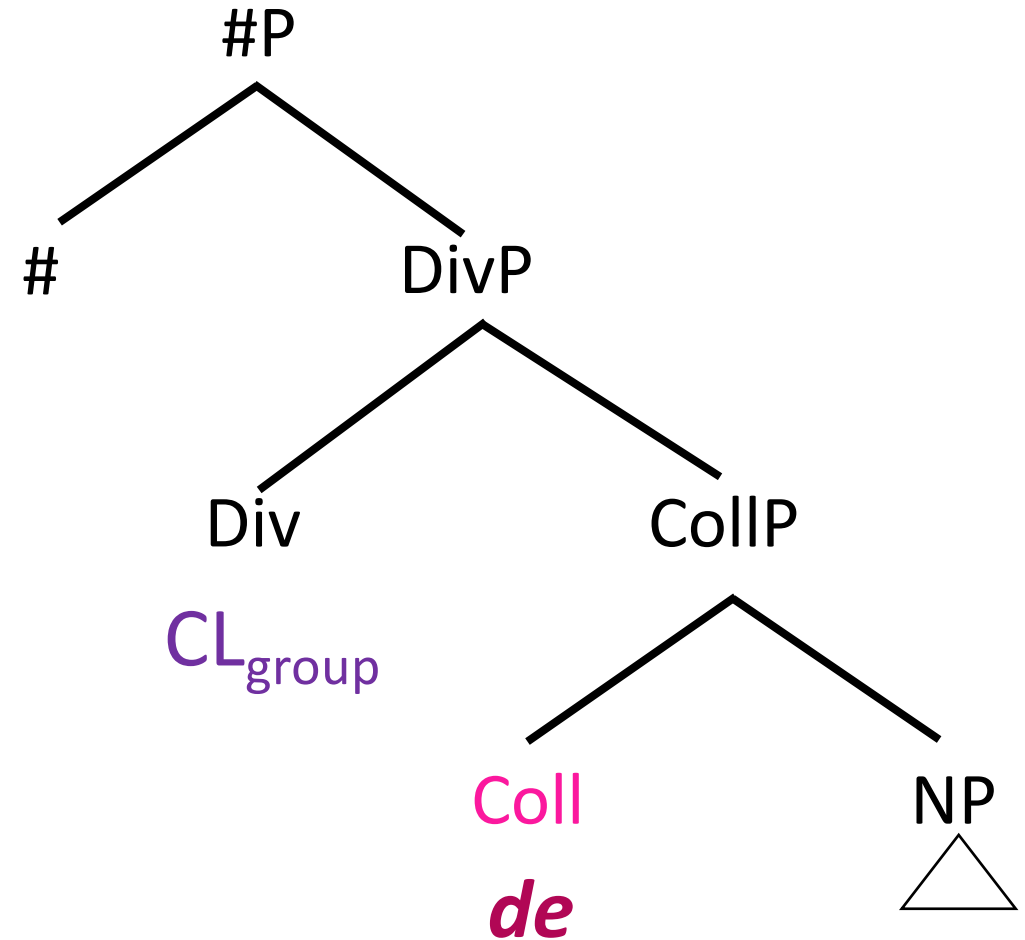

CL_{group} & *de*

Coll: the denotation of nouns are groups.

CL_{group} → [GROUP]

Div containing CL_{group} can take **CollP** as its complement.

*CL_{individual} & *de*

Coll: the denotation of nouns are groups.

CL_{individual} → [ATOMIC]

Div containing CL_{individual} cannot take **CollP** as its complement.

ROAD MAP

- RESEARCH QUESTIONS

- ANALYSIS I: MANDARIN CLASSIFIERS

individual classifiers

group classifiers

- ANALYSIS II: MANDARIN CLASSIFIERS & *-men*

- ANALYSIS III: MANDARIN CLASSIFIERS & *de*

- **CONCLUSION**

SUMMARY

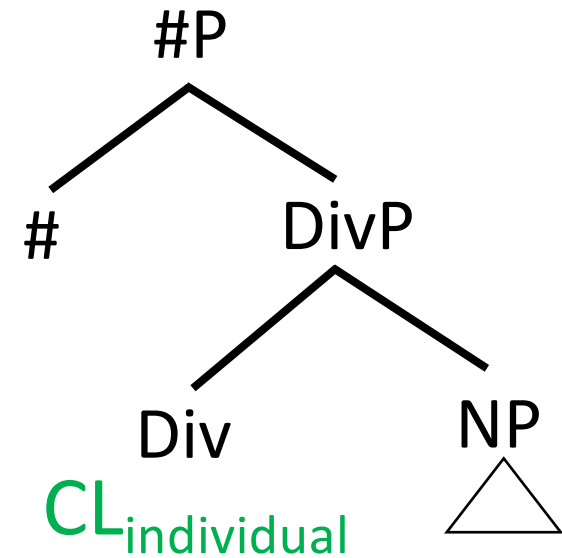

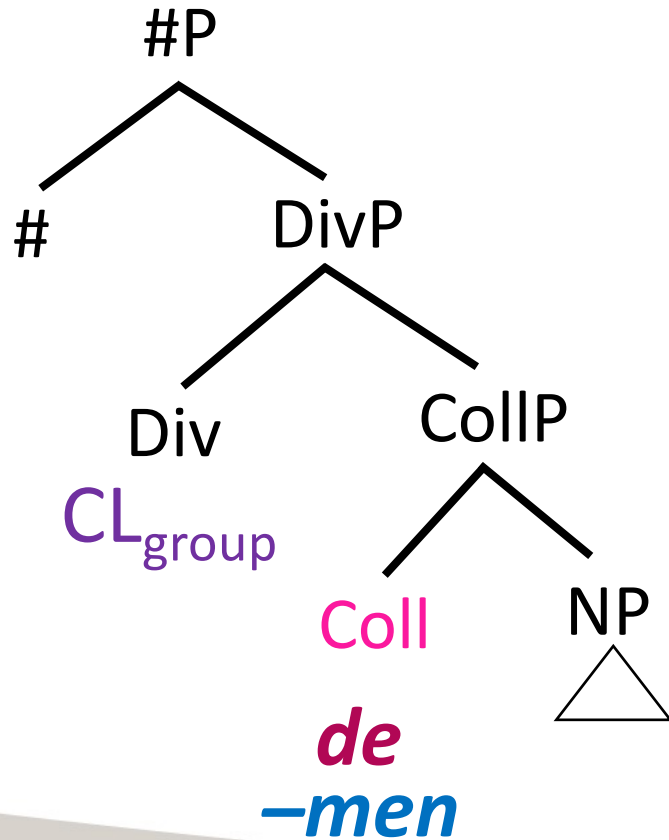

individual and group classifiers are generated in **Div**

SUMMARY

CL_{group} → [GROUP]

$CL_{\text{individual}}$ → [ATOMIC]

RESEARCH QUESTIONS

Mandarin **individual** and **group** classifiers have **similarities** and **differences**, which raise two questions:

i. Are **individual** and **group** classifiers similar because they have the same category?

Yes, **individual** and **group** classifiers have the same category, **Div**.

ii. If so, how do we account for the differences between these two types of classifiers?

Their differences are attributed to **different features** on **individual** and **group** classifiers...and their **complement options** (**CollP** vs NP).
